Dear Sir:

**AMENDMENT**

In response to the undated First Office Action mailed on July 30, 2004, and the informal telephone conversation with the Examiner on July 27, 2004, the Applicant elected Examiner identified Species C: thermoelectric cooler of Fig. 8 and asserted that Claims 1,2,3,4,5,9,10,11,12,13, and 20 are readable on said Species C. The Applicant filed a reply on August 26, 2004, and therein the Applicant contended that all originally filed 20 claims in this patent application are allowable and are herein represented. The Applicant asserted that the generic claims in this application are allowable and therefore reserved the right to claim any such additional species written in dependent form thereon or which otherwise include all the limitations of any such generic claims that may be found allowable by the Examiner.

In response to the undated Office Action mailed on October 8, 2004, and the informal telephone interview with the Examiner on December 1, 2004, please amend the above-identified application as follows:
